

Washington State Professional Certification Clock Hours

available at the Northwest Council for Computer Education Conference March 6 - 9, 2007

If you received your Residency Teaching Certificate in Washington State after September 1, 2000, you are required to receive a Professional Certificate within 5 years.

For Washington State attendees, NCCE has specially designated workshops to expand your Professional Growth Plan and to provide clock hours towards Washington State's Professional Certification requirements.

To strengthen your effective teaching skills, extend your awareness and knowledge of professional standards, and to be a resource for your own school improvement activities and receive clock hours, we encourage you to sign-up for any of the workshops below. Each three-hour workshop is worth three clock hours and six-hour are worth six clock hours.

For additional information on Professional Certification clock hours prior to the conference, please contact Kathy Dorr at kdorr@esd189.org.

Don't forget to sign up for clock hours through ESD 101 at the conference!

The following NCCE workshops meet the Professional Certification Standards and Criteria. The workshop title is listed followed by the workshop code.

| Professional Certification | Workshop Title | Registration Code |
